

Lenovo with Windows Server 2019 & SQL Server 2017

Work smarter.

Lenovo[™]

Are you running mission critical workloads? Need an enterprise-class data platform that's scalable, flexible, and secure? SQL Server 2017 running on Lenovo servers with Windows Server 2019 is your solution.

With SQL Server 2008 End of Support rapidly approaching in mid 2019, many customers need to start looking at the next version of SQL Server for their organization.

SQL Server 2017 delivers industry-leading mission critical database capabilities with everything built-in. Gain transformative insights from in-database advanced analytics with Python and R, and bring data to life with reporting anywhere.

For customers looking to upgrade their servers, SQL Server 2017 on Lenovo servers with Windows Server 2019 brings you the latest in software and hardware innovations and allows you to bridge the on-premises-cloud gap, improve your security, and maximize your storage and computing capabilities.

You're already working hard.
We want to help you work smart.

Different is better.

SQL Server 2017 Running on Lenovo Servers with Windows Server 2019: Industry leading performance & security at scale

	TRUSTED	FLEXIBLE	INTELLIGENT
SQL SERVER 2017	Protect your data on Windows and Linux with controlled access and multiple layers of protection.	Your choice of language and platforms. Build modern applications using the language of your choice, on-premises and in the cloud, now on Windows, Linux and Docker containers.	Powerful analytics and integrated reporting tools allow for deeper insight with Python and R. Also supports multiple data sources, and allows you to query across multiple types of data.
WINDOWS SERVER 2019	More organizations worldwide trust Windows Server everyday that any other OS. ¹ Prevent and detect zero-day exploits, network attacks, and data breaches with Windows Defender Advanced Threat Protection (ATP).	Leverage both hybrid cloud and on-premises capabilities along with added support for Linux to enable future growth and success with a long-term approach to your ongoing infrastructure and data needs.	Utilize new HCI features to consolidate compute, storage, and networking into the same nodes, allowing you to reduce infrastructure cost while getting better performance, scalability, and reliability.
LENOVO SERVERS	Lenovo is rated number one in server customer satisfaction ² and number one in server reliability ³ .	Reduce costs and complexity by investing in Lenovo servers that handle today's workload and expand to accommodate future growth.	Lenovo holds over 127 world record performance benchmarks ⁴ . When you invest in a Lenovo data center product, expect intelligent design that delivers maximum returns.
